## Powder Coated Baked Enamel Color Selector

For satisfactory results, select a color that coordinates well with the wall color.

Sharp contrasting colors may make a smaller room look crowded. To help lessen their institutional appearance, health care facilities are currently using updated refreshing colors for a welcomed change. While every effort to furnish an identical reproduction of your selected color will be made, allowance for certain uncontrollable factors in the baking process and the paint manufacturers shade tolerance must be considered.

**\*High-gloss Black & White available at no extra charge.**

SLIGHT BATCH TO BATCH COLOR VARIATIONS MAY OCCUR

#84 Burgundy

#34 San Tan

#99 Deep Blue

#94 Ivy Green

#60 Strata Gray

#57 Bahama Blue

### PROTECTION & APPEARANCE ARE THE REQUISITES FOR A GOOD FINISH

Toilet Partitions subject to frequent washings and cleaning as well as various acid conditions, require better than usual protection. Through continuous tests and research we have, with the cooperation of our paint manufacturer, developed a baked-on enamel finish which strongly resists these conditions. In addition to this superior grade material, we use Galvanized Bonderized Steel exclusively, with a minimum thickness of the zinc coating of .00015 inches. Therefore we add the protection which zinc affords and the excellent adhesion of the finish which Bonderizing provides. The same rigidly tested high quality finish is used on all our other products.

Following the most current color trends, we have selected our standard colors utilizing a variety of modern shades that can coordinate with any surrounding color schemes.
